Title of your presentation

Your name here

Your presentation date, for example March 3, 2023

Content

1 First subject

- This subsection is not in the progress bar but is in the table of contents!

2 Applications

3 Also

What you should know before I start with my thesis work

In the frame-environment you can do what you're used to to make it print on a slide. For example use text and formula's like

$$E = \frac{p^2}{2m} \tag{1}$$

$$E_{rel}^2 = m^2 c^4 + p^2 c^2 \tag{2}$$

Important

It is very I M P O R T A N T to be able to *emphasise* in *different* **ways**!

Let's continue

Sometimes it is a shame if everything you want to say is already on the slide.

Stelling

You do not yet know the proof of this theorem.

Proof

The proof is here.

But we can fix this!

Let's try this again.

Again!

Stelling

You do not yet know the proof of this theorem.

Again!

Stelling

You do not yet know the proof of this theorem.

Proof

The proof is here.

Again!

Stelling

You do not yet know the proof of this theorem.

Proof

The proof is here.

Much better!

More advanced

We can even make the text disappear. (Or keep an important text/formula on your slide.)

More advanced

We can even make the text disappear. (Or keep an important text/formula on your slide.)
Peekaboo!

More advanced

We can even make the text disappear. (Or keep an important text/formula on your slide.)

Peekaboo!

Go and seek! (by lack of a better translation of *Wie niet weg is is gezien!*)

More advanced

We can even make the text disappear. (Or keep an important text/formula on your slide.)
And let's go on...

Enumerations can look better this way as well

- 9...

Enumerations can look better this way as well

- 9...

- 10!

Enumerations can look better this way as well

- Ready or not here I come!

We can also place colums next to each other.

Also cool
More indents in your code.

Attention!
A block for even more *emphasis*!
Just differently colored.

We can even include pictures!

Figure: A picture you might recognise.

Also

Don't forget to compile, the table of contents and the progress bar
will need more than one compilation to be updated correctly.

At the end of a presentation you thank your audience and leave
room for questions.

Then your presentation is done!

P.S.

It looks a bit more professional not to have the a-eswiggle on each slide. How to remove this is in the code.
